

All You Need To Know About KFC Console Controller

In June 2020, the gaming scene was met with a finger-lickin' disclosure as KFC (yes - KFC) declared a new gaming console to go no holds barred with the PlayStation 5 and Xbox Series X.

Officially called the **KFC Console Controller**, it promised to offer gameplay at 4K goals with invigorating paces of up to 240 Hz.

The standout component of the console, however, is its licensed Chicken Chamber.

This is a warmed compartment within the console intended to keep your fried chicken - or some other food thing, besides - steaming hot while you partake in your gaming meeting.

Anyway, what exactly is this console, how did it work out as expected, and how can you get it for yourself?

Read on to figure out all that you want to be aware of KFC's latest and greatest gaming creation, including **KFC Console Controller** cost, delivery date, controller, games and gameplay, and pre-request subtleties.

About KFC Console

The console from KFC is an upcoming gaming machine being delivered by KFC in partnership with the well-known custom-PC hardware company Cooler Master.

Understandably, then, at that point, KFC's new gaming [KFC Console Controller](#) is to a lesser degree a console and to a greater extent a powerful custom gaming PC.

Under the hood, it sports an Intel NUC 9 Extreme Register Component containing a ninth Gen Intel Center i9-9980HK processor.

This is combined with a hot-swappable ASUS RTX design card. For capacity, the console offers two Seagate Barracuda/Firecuda 1 TB SSDs.

Each of these amounts offers a VR-prepared, beam-following-filled gameplay experience rendered in 4K goals with framerates up to 240 fps.

Additionally, the bundle is similarly all around as amazing as its items. The new console's plan takes motivation from KFC's Deal Can.

Helmed by the Swedish expert 'Timpelay,' the plan utilizes a custom form of Cooler Master's NC100 chassis.

It includes a tasteful round and hollow black chassis with a red-illuminated power button and cooling fans at the top covered by a barbecue.

Becoming the dominant focal point, however, is the Chicken Chamber warming compartment that makes the console however special as it seems to be.

Is The KFC Console Genuine?

As crazy and incredible as it sounds, we should affirm that this wonderous creation is for sure genuine.

It was first reported in June 2020, and then, at that point, officially uncovered in December of that very year.

Furthermore, Cooler Master's relationship with the item likewise loans it a good measure of validity.

Various presumed outlets additionally covered the uncover, including Forbes, BBC, and The Autonomous.

KFC Console Controller gaming console, however a surprise, is not a total flight for KFC. The inexpensive food chain has made different forays into the universe of gaming before.

In May 2015, KFC delivered a retro-motivated computer game called 'Colonel Mission,' where gamers could play as Colonel Sanders in various little games.

Besides, the game is additionally accompanied by restricted version drumstick-formed controllers!

A while later, in September 2019, KFC delivered a dating test system on Steam called 'I Love You, Colonel Sanders! A Finger-Lickin' Good Dating Test system.'

What's more? **KFC Console Controller** likewise delivered a themed controller for the Xbox Series X console and a fried chicken keyboard, mouse, and USB stick.

Furthermore, it emerged with the Gamer's Box 2.0 - a takeout box that could likewise act as a Bluetooth controller and dock for your phone while you game!

KFC likewise delivered a computer-generated simulation experience called 'The most difficult way possible: A KFC Virtual Preparation Break Room.'

That is all to say that a next-gen gaming console was maybe just the next consistent move toward KFC's movement, and is without a doubt genuine!
