Fancy [cigarette lighters](#) are a great way to add some flair to your smoking accessories collection. They come in all shapes and sizes and can be used for both personal and professional purposes.

Cigarette lighters are useful for lighting cigarettes, cigars, pipes, and other smoking devices. The most basic models consist of a simple ignition mechanism and a fuel reservoir. More advanced models include additional features such as windproof flames, refillable reservoirs, and even flint wheels for starting fires.

The best cigarette lighters are usually made from metal or plastic. However, there are some that have been designed with a wooden body. Cigarette lighters make it easier for them to light up their cigarettes without having to use matches or matches.

Second, cigarette lighters are easy to carry around with you wherever you go. They may not be as small as some other everyday items that can be carried around easily, but they are still small enough so that they will not take up much space in your pocket or bag when you go out on the town or go shopping at the mall or supermarket!
