

**HOW TO**

**DEVELOP**

*Mini Games*

[Get in Touch](#)

# Choose a Concept

- Start with conceptualization for your Mini Game
- Discuss Gameplay, mechanism, theme and goal

# Do Thorough Market Research

- Research your idea to get more insight
- Play competitive games to have an idea about the features

# Create a Design Document

- Make an outline of the game
- Decide the technologies to use

# Create a Prototype

- Design a basic version of the game
- Tangible test to improve on the final product

# Start Building

- Now you have to start the coding
- Select the right tools and technologies to create the code

# Test Your Game App

- Make sure your game works and is fun
- Identify the bugs to improve your game for the final

# Market the Finished App

- Market your app after you get your final product
- Testimonials, landing page, allowing everyone to play the game

# Thank You
